

Little Gem Studio Instructions

Address: Elektronstraat 13B, Amsterdam

WiFi: Little Gem 5G

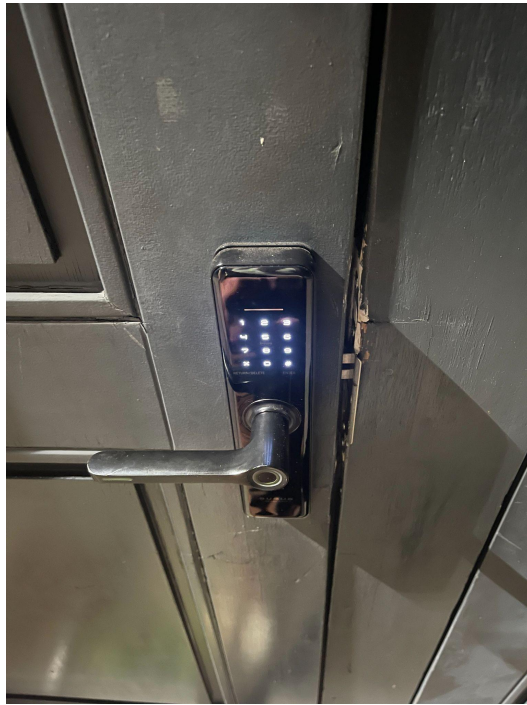

Password: LittleGem5G!

For emergencies, whatsapp or call: +31646067692

You can find the entrance on the little square behind the fence on the right of the Holtkamp sign:

Activate the electronic doorlock by moving your hand in front of the top area of the lock, the motion detection will turn on the lights of the lock. **Type in the passcode** you have received 15 minutes prior to the booked timeslot (don't forget to end the code with #). When the code works the light will turn green and the door will open. **If you fail to enter the code correctly three times, the door will stay locked for 5 min.** If you then try and fail again three times the door will stay locked for an hour, so please be mindful when typing in the passcode.

After opening the door, walk down the stairs to find another door with the same lock. Repeat the process and you're in. **If you encounter the space dirty or with broken gear/materials, please contact +31646067692**

Producers, turn on the power buttons and connect the usb-c cables to your computer and you're ready to go.

After leaving, **please close the door by pulling up the lever** so that the lock falls in place.
Please leave the space clean and return items to their original positions.
